

ABSTRACT

The present invention relates to diamide derivatives represented by the following general formula (1):

wherein A is a phenyl group or the like, which may be substituted, B is $-\text{CH}=\text{CH}-$, $-\text{C}=\text{C}-$, $-(\text{CH}=\text{CH})_2-$, $-\text{C}=\text{C}-\text{CH}=\text{CH}-$, $-\text{CH}=\text{CH}-\text{C}=\text{C}-$, phenylene or the like, and W is

comprising such a compound. These compounds have an excellent inhibitory effect on the production of an IgE antibody and are hence useful as antiallergic agents and the like.
